

URC Utility Relay Company

SIEMENS RL

Upgrade your circuit breaker with a modern digital trip unit, complete with LSIG protection, communication capabilities, power monitoring and many more features. We offer dozens of Siemens RL kits to fit your exact needs, replacing the obsolete Dual Static, Limitrip, or Static Trip units with AC-PRO-II®. Curb the cost of an expensive replacement with a cost-effective retrofit kit offered by Utility Relay Company.

- ☐ Direct replacement kit options
- ☐ Complete kit options including CTs and actuators

Pre-Engineered Kits

Our AC-PRO-II® retrofit kits are pre-engineered with functionality and ease of installation as the priorities.

Superior Quality

Each trip unit is factory calibrated, burned-in at elevated temperature, and final tested with a trip unit test report included.

Kits Have What You Need

Our modernization kits have what you need – either for a direct trip unit replacement or a more comprehensive upgrade including CTs and actuator. You will receive all required components including brackets, hardware and wiring harness along with a detailed instruction manual.

Contact URC for the exact kit to fit your needs.
